

Newsletter Vol. 09

This week, most of our members were at the Game Developer's Conference. However, the absent member worked over spring break and those that did stay behind made great strides towards halves presentations.

The Jim phone conversation, the Glitch conversation and the lawyer part have all been reformatted to be more dynamic. On Wednesday, Judge David Cashman came to the ETC to help film the judge endings and even reformat the lawyer's talks in order to have a more accurate script. After all this filming, rewriting and re-recording, the most video portions and transitions are now complete.

Next week, we will be giving our halves presentations on Wednesday. We are expecting to see our clients there as well.
