

MILESTONES OF NEXT WEEK

Alpha Test

When: Oct.18 Passive Test
Oct.19 Active Test

Our preparations

We've made scheduled time slots, divide out testers into different scale of groups(1, 2, and 3 or more).

After the test, there will be a survey about their memorable moments(to see if they match with the data), control experience and general opinions. The show we picked is "Colbert Roasts Bush - 2006 White House Correspondents' Dinner". 10 minutes of it.

UI art/ programming has been done, and waited to be integrated with other code.

Stage and curtains model has been done.

We designed a walk through of the viewing experience in DynacTiV system.

Design & Art

• Stage

We expanded our scope with a stage themed design. The viewing experience will take place on a virtual stage to enhance the viewing experience. Inspired by Gun-stringer.

• Simulated Audience

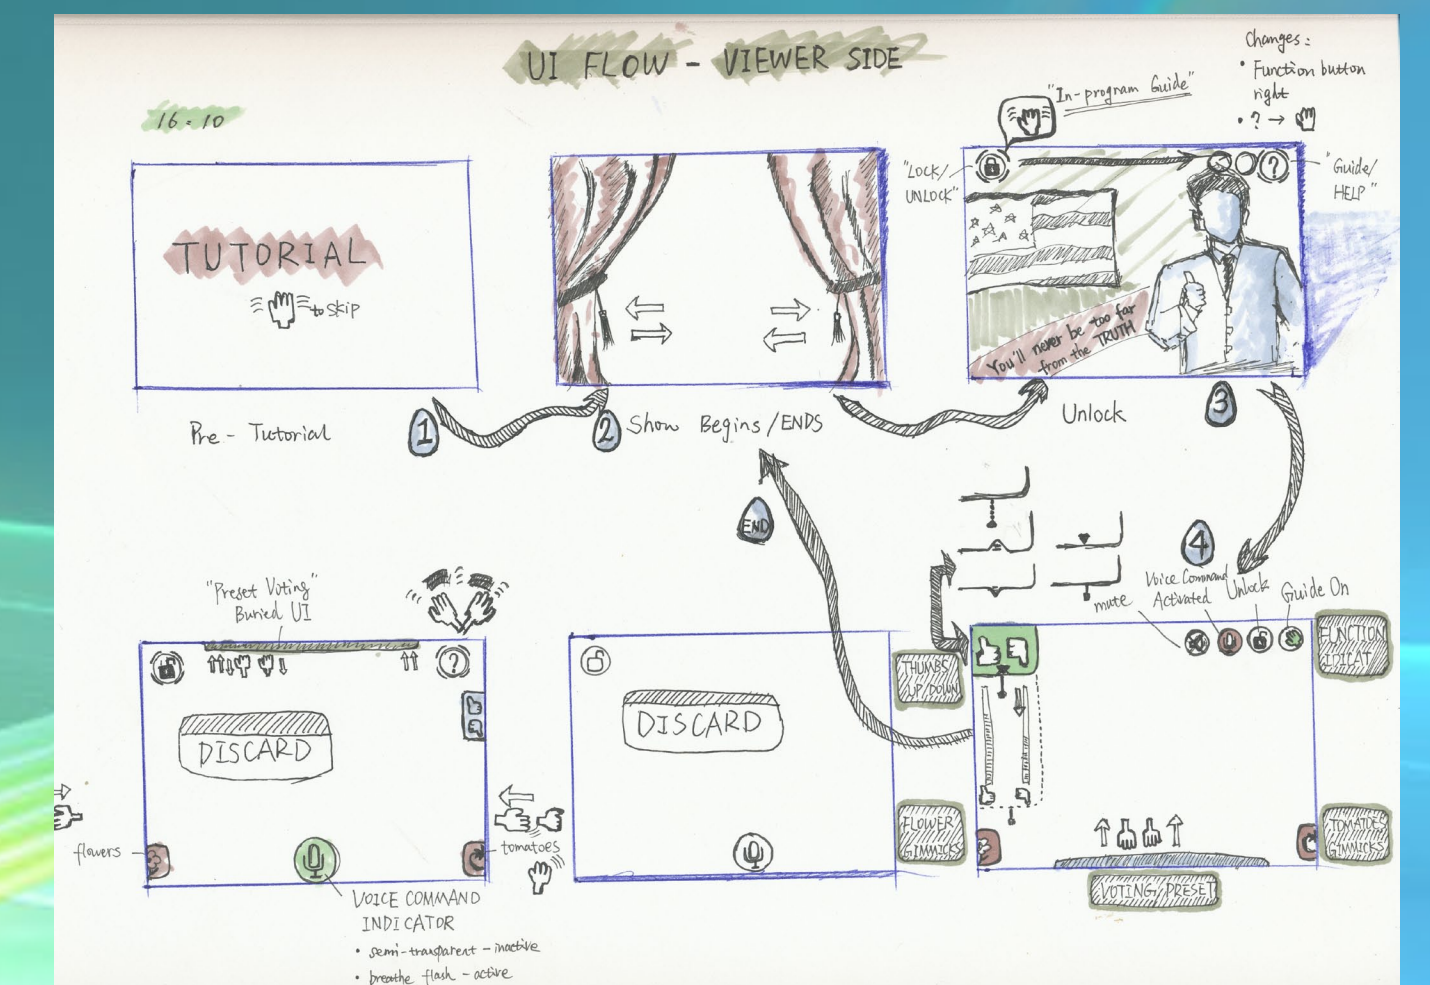

On the bottom of the screen is a row of silhouettes that simulate a live audience. This simulated audience will react to the viewer.

- 1.) Stand up for too long - "Sit Down!"
- 2.) Stop moving for a while - "You asleep?"
- 3.) Leave the screen for a while - "You still there?"
- 4.) Sneeze - "Bless you." ON HOLD*
- 5.) Talk - "Shh." ON HOLD*
- 6.) Applause - Applause ON HOLD*
- 7.) Booing - Booing ON HOLD*

*The voice recognition technology isn't integrated into Unity yet.
