MEGALODON

Januray 27th, 2012

This week Team Megalodon continued working on the re-skinning of the game. On tuesday the teams presented their progress to the OCCO. With the exception of a technical difficulty, the playtests went well and each team recieved valuable feedabck.

It was suggested that each team try to create something that makles them unique from the other team, so that has played a major role in how they have developed their games this week. They've been working really hard and the games are coming along great.

On Tuesday each team will present their game to Rich Hilleman and explain:
- What makes their game fun
- What makes them different from the other team
- What problems were solved easily
- What problems were not resolved

Following these presentations, we will give a presentation detailing the plan for the rest of the semester and how we plan to attack it for the first few weeks. We'll also detail the roles that each person will perform for the rest of the semester.

We met on Thursday of this week and decided that the roles would break down as follows:

Producer: Noah Bench
Lead Designer: Mohan Subramanian
Lead Programmer: Jerry Fu
Engine Programmer: Lusha Zhang
Gameplay Programmer: Nagarjuna Varma
AI Programmer: Siva Loganathan
Server Communication: Animish Gadve
Server Behavior: Siva Loganathan
Audio Design: Sophie Lu
Audio Programmer: Sophie Lu
Tech Artist: Jue Wang
UI Designers: Joan Kim & Jingyi Feng

This week we had our first organized play session of Realm of the Mad God, a browser based MMORPG. We shouted across the office at each other as we fought goblins, dragons, and even the Mad God himself.

The scope of the project going forward will be massive, but the team is extremely excited about what we're working on. We intend to meet our client's wish of changing players' expectation of what browser gaming can be.

TEAM:

		ADVISORS:
Noah Bench	Lusha Zhang	Jiyoung Lee
Jerry Fu	Sivakumar Loganathan	Carl Rosendahl
Animish Gadve	Mohan Subramanian	
Jue Wang	Jingyi Feng	
Joan Kim	Nagarjuna "Arjun" Varma	
Sophie Lu
