week 4

#### ART

Storyboards for the film and interaction are underway, one of which has been made into an animatic. A concept cinemagraph has also been made to show a style of still photography incorporating small repeated movements. This effect will recur throughout the visual portions of the performance.

All branding materials as well as the website have been finalized.

#### DESIGN

More contacts have been made with main-campus faculty and facilities within the arts department. This is necessary for the project when actors and costumes will be needed for the film portions of the visuals. A list of assets is being created so that it will be readily available once the storyboards have been completed.

#### TECH

Scripting for the first interaction has been coded and debugged. Playtesting will now begin!
