

Getting things Growing!

Overview

This week has been spent working on finishing things up. Not only have we been working to finish the experience but we have also been working to finish different aspects of the final experience. This list ranges from finishing images for RFID images as well as finalizing ideas for the whole area for the installation. We also got to visit our clients to make any final arrangements for the push to install.

Finishing Touches

One of the things we wanted to help our clients do is plan out what they could possibly do to theme the area. How we have been helping them do that is making some suggestions on placement, items and decals. We wanted to do as much planning for this as possible before heading up to the Schrader Center during the middle of the week. We did that by doing interior mock ups we then refined after talking a bit with our client. We later made a color form that would lend itself to the 2d diagram made for placement of all our equipment..

RFID Designs

Along with this we also started to think about what we want to do with the RFID cards. We were thinking that they could be themed a lot like collectible cards. How we plan to do that is by making 3 cool different images that can be used for the three different experiences we have made.

Getting things Growing!

Visit to the Client

This week we also made a visit to the client to finalize all the things that will need to happen before we make the final install. We took up all our documentation to go over with the client. They liked our idea of deep green walls and were happy with our plans for the kiosk and floor decals. They only need to do some small changes before we head up next week. The rest is on us to finish up and prepare for the install.

Conclusion

We are well on our way to finishing up. We just need to take care of a few final things. We want to make sure that our experience is fun, engaging and strong before we pass it off to the client. We also want to make sure that the folks at the Schrader Center have everything they need to complete the space our experience is going to call home. Next week will be working our way to installation as well as Soft Opening.

What's Next

Next week is going to be a busy one with preparing for playtesting, installation and Soft Opening.
